

## René Meurer

### Co-Operation Partner

- **14 years' experience as operational management consultant for process improvement and organisational change**
- **Senior implementation project manager at shop-floor and management level**
- **Extensive Lean Management knowledge and expertise**
- **Qualified Trainer and Personal Coach**

### Experience

René has extensive experience in initiating, delivering and supporting national and international companies in operational performance improvement and change projects. His focus is twofold: improving and re-designing the current status quo or designing new business models and strategies.

Delivering more than 60 projects in different areas, such as: production and logistics, order management, research & development, organizational development, procurement, shop-floor management.

Experience especially in mid-size firms in various branches, such as chemical industry, machinery and plant engineering, or plastic processing industry.

Extensive experience and knowledge in lean management and its methods, such as value stream analysis and design, Makigami, 5S, Gemba or Kata.

Developed and implemented strategies together with shop-floor workers and management to improve shop-floor performance; thus he knows about expectations, problems and difficulties on shop-floor and management level and how to deal with those.

### Current Positions & Background

#### Co-operation Partner

- Carpe Diem International, Germany, UK and China
- Former Senior Consultant and company officer at a German Operational Management Consultancy.

#### Senior Project Manager

René Meurer gained his experience in a variety of different projects. He acts as project manager and communicator between owners, board and shop-floor level to facilitate collaboration and mutual understanding. He has completed projects for corporations in Germany, Europe, North America and China.

#### Coach and Trainer

René as a management consultant is convinced that the combination of consulting, training and coaching is necessary to successfully implement improvements. Hence, he specifically supports managers during change initiatives and emphasizes the importance of knowledge transfer.
